

With incredible ideas and undying zeal to excel,  
we are here to beget the culture of progress

## ABOUT ADISON

Looking at the restrictions on mining and its adverse effects on the environment, a substitute of natural stone was necessary. To give people an economical replacement for conventional stone tiles, Adison Granito was conceived under the leadership of Mr. Ashok Patel in the year 2016. With its focus on providing luxury at affordable prices, Adison Granito is emerging as one of India's top brands in the ceramic industry.

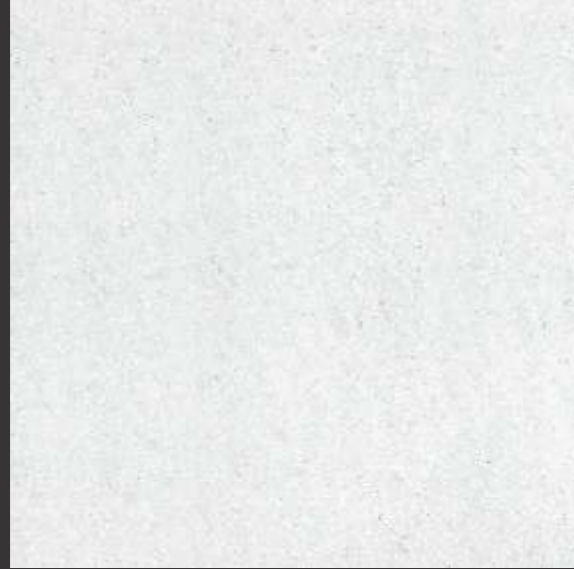

With a fully-automated facility in Talod, Himmatnagar, which is spread over 1, 82, 000 sq. ft., Adison is pioneering the launch of new products in the market. With their in-house R&D wing and state-of-the-art laboratory, Adison is developing aesthetically pleasing products as per the market requirements with a zero-tolerance policy towards quality. With strategic associations with dealers in all major Indian cities, Adison is en route to creating waves of eccentric achievements in the market.
